# Introduction

## *Context of the consultation*

Over the last two decades, digital technology and the Internet have reshaped the ways in which content is created, distributed, and accessed. New opportunities have materialised for those that create and produce content (e.g. a film, a novel, a song), for new and existing distribution platforms, for institutions such as libraries, for activities such as research and for citizens who now expect to be able to access content – for information, education or entertainment purposes – regardless of geographical borders.

This new environment also presents challenges. One of them is for the market to continue to adapt to new forms of distribution and use. Another one is for the legislator to ensure that the system of rights, limitations to rights and enforcement remains appropriate and is adapted to the new environment. This consultation focuses on the second of these challenges: ensuring that the EU copyright regulatory framework stays fit for purpose in the digital environment to support creation and innovation, tap the full potential of the Single Market, foster growth and investment in our economy and promote cultural diversity.

In its "Communication on Content in the Digital Single Market"<sup>1</sup> the Commission set out two parallel tracks of action: on the one hand, to complete its on-going effort to review and to modernise the EU copyright legislative framework<sup>23</sup> with a view to a decision in 2014 on whether to table legislative reform proposals, and on the other, to facilitate practical industry-led solutions through the stakeholder dialogue "Licences for Europe" on issues on which rapid progress was deemed necessary and possible.

The "Licences for Europe" process has been finalised now<sup>4</sup>. The Commission welcomes the practical solutions stakeholders have put forward in this context and will monitor their progress. Pledges have been made by stakeholders in all four Working Groups (cross border portability of services, user-generated content, audiovisual and film heritage and text and data mining). Taken together, the Commission expects these pledges to be a further step in making the user environment easier in many different situations. The Commission also takes note of the fact that two groups – user-generated content and text and data mining – did not reach consensus among participating stakeholders on either the problems to be addressed or on the results. The discussions and results of "Licences for Europe" will be also taken into account in the context of the review of the legislative framework.

As part of the review process, the Commission is now launching a public consultation on issues identified in the Communication on Content in the Digital Single Market, i.e.: *"territoriality in the Internal Market, harmonisation, limitations and exceptions to copyright in the digital age; fragmentation of the EU copyright market; and how to improve the effectiveness and efficiency of enforcement while underpinning its legitimacy in the wider context of copyright reform"*. As highlighted in the October 2013 European Council Conclusions<sup>5</sup> *"Providing digital services and content across the single market requires the establishment of a copyright regime for the digital age. The Commission will therefore*

<sup>5</sup> EUCO 169/13, 24/25 October 2013.

*complete its on-going review of the EU copyright framework in spring 2014. It is important to modernise Europe's copyright regime and facilitate licensing, while ensuring a high level protection of intellectual property rights and taking into account cultural diversity".*

This consultation builds on previous consultations and public hearings, in particular those on the "Green Paper on copyright in the knowledge economy"<sup>6</sup>, the "Green Paper on the online distribution of audiovisual works"<sup>7</sup> and "Content Online"<sup>8</sup>. These consultations provided valuable feedback from stakeholders on a number of questions, on issues as diverse as the territoriality of copyright and possible ways to overcome territoriality, exceptions related to the online dissemination of knowledge, and rightholders' remuneration, particularly in the audiovisual sector. Views were expressed by stakeholders representing all stages in the value chain, including right holders, distributors, consumers, and academics. The questions elicited widely diverging views on the best way to proceed. The "Green Paper on Copyright in the Knowledge Economy" was followed up by a Communication. The replies to the "Green Paper on the online distribution of audiovisual works" have fed into subsequent discussions on the Collective Rights Management Directive and into the current review process.

### ***How to submit replies to this questionnaire***

You are kindly asked to send your replies **by 5 February 2014** in a MS Word, PDF or OpenDocument format to the following e-mail address of DG Internal Market and Services: **markt-copyright-consultation@ec.europa.eu**. Please note that replies sent after that date will not be taken into account.

This consultation is addressed to different categories of stakeholders. To the extent possible, the questions indicate the category/ies of respondents most likely to be concerned by them (annotation in brackets, before the actual question). Respondents should nevertheless feel free to reply to any/all of the questions. Also, please note that, apart from the question concerning the identification of the respondent, none of the questions is obligatory. Replies containing answers only to part of the questions will be also accepted.

You are requested to provide your answers directly within this consultation document. For the "Yes/No/No opinion" questions please put the selected answer in **bold** and underline it so it is easy for us to see your selection.

In your answers to the questions, you are invited to refer to the situation in EU Member States. ***You are also invited in particular to indicate, where relevant, what would be the impact of options you put forward in terms of costs, opportunities and revenues.***

The public consultation is available in English. Responses may, however, be sent in any of the 24 official languages of the EU.

### ***Confidentiality***

The contributions received in this round of consultation as well as a summary report presenting the responses in a statistical and aggregated form will be published on the website of DG MARKT.

Please note that all contributions received will be published together with the identity of the contributor, unless the contributor objects to the publication of their personal data on the

grounds that such publication would harm his or her legitimate interests. In this case, the contribution will be published in anonymous form upon the contributor's explicit request. Otherwise the contribution will not be published nor will its content be reflected in the summary report.

Please read our [Privacy statement](#).

**PLEASE IDENTIFY YOURSELF:**

**Name:**

**Booksellers Association of the UK & Ireland, 6 Bell Yard, London WC2A 2JR, United Kingdom**  
[www.booksellers.org.uk](http://www.booksellers.org.uk)

**Response completed by Tim Godfray, Chief Executive**

**Our comments are indicated in red in the following document.**

In the interests of transparency, organisations (including, for example, NGOs, trade associations and commercial enterprises) are invited to provide the public with relevant information about themselves by registering in the Interest Representative Register and subscribing to its Code of Conduct.

- If you are a Registered organisation, please indicate your Register ID number below. Your contribution will then be considered as representing the views of your organisation.

**Registered ID Number: 574274410079-44**

- If your organisation is not registered, you have the opportunity to [register now](#). Responses from organisations not registered will be published separately.

**If you would like to submit your reply on an anonymous basis please indicate it below by underlining the following answer:**

- Yes, I would like to submit my reply on an anonymous basis

**TYPE OF RESPONDENT** (Please underline the appropriate):

- End user/consumer** (e.g. internet user, reader, subscriber to music or audiovisual service, researcher, student) **OR Representative of end users/consumers**  
→ for the purposes of this questionnaire normally referred to in questions as "**end users/consumers**"
  
- Institutional user** (e.g. school, university, research centre, library, archive) **OR Representative of institutional users**  
→ for the purposes of this questionnaire normally referred to in questions as "**institutional users**"
  
- Author/Performer OR Representative of authors/performers**
  
- Publisher/Producer/Broadcaster OR Representative of publishers/producers/broadcasters**  
  
→ the two above categories are, for the purposes of this questionnaire, normally referred to in questions as "**right holders**"
  
- Intermediary/Distributor/Other service provider** (e.g. online music or audiovisual service, games platform, social media, search engine, ICT industry) **OR Representative of intermediaries/distributors/other service providers**  
→ for the purposes of this questionnaire normally referred to in questions as "**service providers**"
  
- Collective Management Organisation**
  
- Public authority**
  
- Member State**
  
- Other** (Please explain):

## Rights and the functioning of the Single Market

### *A. Why is it not possible to access many online content services from anywhere in Europe?*

#### **[The territorial scope of the rights involved in digital transmissions and the segmentation of the market through licensing agreements]**

Holders of copyright and related rights – e.g. writers, singers, musicians - do not enjoy a single protection in the EU. Instead, they are protected on the basis of a bundle of national rights in each Member State. Those rights have been largely harmonised by the existing EU Directives. However, differences remain and the geographical scope of the rights is limited to the territory of the Member State granting them. Copyright is thus territorial in the sense that rights are acquired and enforced on a country-by-country basis under national law<sup>9</sup>.

The dissemination of copyright-protected content on the Internet – e.g. by a music streaming service, or by an online e-book seller – therefore requires, in principle, an authorisation for each national territory in which the content is communicated to the public. Rightholders are, of course, in a position to grant a multi-territorial or pan-European licence, such that content services can be provided in several Member States and across borders. A number of steps have been taken at EU level to facilitate multi-territorial licences: the proposal for a Directive on Collective Rights Management<sup>10</sup> should significantly facilitate the delivery of multi-territorial licences in musical works for online services<sup>11</sup>; the structured stakeholder dialogue “Licences for Europe”<sup>12</sup> and market-led developments such as the on-going work in the Linked Content Coalition<sup>13</sup>.

“Licences for Europe” addressed in particular the specific issue of cross-border portability, i.e. the ability of consumers having subscribed to online services in their Member State to keep accessing them when travelling temporarily to other Member States. As a result, representatives of the audio-visual sector issued a joint statement affirming their commitment to continue working towards the further development of cross-border portability<sup>14</sup>.

Despite progress, there are continued problems with the cross-border provision of, and access to, services. These problems are most obvious to consumers wanting to access services that are made available in Member States other than the one in which they live. Not all online services are available in all Member States and consumers face problems when trying to access such services across borders. In some instances, even if the “same” service is available in all Member States, consumers cannot access the service across borders (they can only access their “national” service, and if they try to access the “same” service in another Member State they are redirected to the one designated for their country of residence).

---

<sup>9</sup> This principle has been confirmed by the Court of justice on several occasions.

<sup>10</sup> Proposal for a Directive of the European Parliament and of the Council of 11 July 2012 on collective management of copyright and related rights and multi-territorial licensing of rights in musical works for online uses in the internal market, COM(2012) 372 final.

<sup>11</sup> Collective Management Organisations play a significant role in the management of online rights for musical works in contrast to the situation where online rights are licensed directly by right holders such as film or record producers or by newspaper or book publishers.

<sup>12</sup> You can find more information on the following website: <http://ec.europa.eu/licences-for-europe-dialogue/>.

<sup>13</sup> You can find more information on the following website: <http://www.linkedcontentcoalition.org/>.

<sup>14</sup> See the document “Licences for Europe – ten pledges to bring more content online”: [http://ec.europa.eu/internal\\_market/copyright/docs/licences-for-europe/131113\\_ten-pledges\\_en.pdf](http://ec.europa.eu/internal_market/copyright/docs/licences-for-europe/131113_ten-pledges_en.pdf).

This situation may in part stem from the territoriality of rights and difficulties associated with the clearing of rights in different territories. Contractual clauses in licensing agreements between right holders and distributors and/or between distributors and end users may also be at the origin of some of the problems (denial of access, redirection).

The main issue at stake here is, therefore, whether further measures (legislative or non-legislative, including market-led solutions) need to be taken at EU level in the medium term<sup>15</sup> to increase the cross-border availability of content services in the Single Market, while ensuring an adequate level of protection for right holders.

**1. [In particular if you are an end user/consumer:] Have you faced problems when trying to access online services in an EU Member State other than the one in which you live?**

YES - Please provide examples indicating the Member State, the sector and the type of content concerned (e.g. premium content such as certain films and TV series, audio-visual content in general, music, e-books, magazines, journals and newspapers, games, applications and other software)

.....

.....

NO

NO OPINION

**2. [In particular if you are a service provider:] Have you faced problems when seeking to provide online services across borders in the EU?**

YES - Please explain whether such problems, in your experience, are related to copyright or to other issues (e.g. business decisions relating to the cost of providing services across borders, compliance with other laws such as consumer protection)? Please provide examples indicating the Member State, the sector and the type of content concerned (e.g. premium content such as certain films and TV series, audio-visual content in general, music, e-books, magazines, journals and newspapers, games, applications and other software).

**A bookseller selling an e-book within a member state, or across an EU frontier, has to abide by any Conditions of Sale [“CoS”] set by his/her immediate supplier. There is nothing untoward in these arrangements. Importantly, IFFRO maintain that “..... the copyright holder is at liberty to limit the scope of the mandate granted to the Reproduction Rights Organisation, including limitations on the basis of territoriality”.**

**These CoS mentioned above quite often specify, among other things, the territories in which the reseller has the authorisation to sell the e-book covered by the invoice. Sometimes, this has a bearing on the selling of e-books across EU frontiers.**

**It should be pointed out that in the UK, Terms & Conditions of Supply are a confidential matter between individual bookseller and individual publisher, and terms agreements and arrangements are subject to individual negotiation. Copyright is not the issue in stake in these contracts; they are the result of business decisions made by the parties.**

NO

<sup>15</sup> For possible long term measures such as the establishment of a European Copyright Code (establishing a single title) see section VII of this consultation document.

NO OPINION

3. *[In particular if you are a right holder or a collective management organisation:] How often are you asked to grant multi-territorial licences? Please indicate, if possible, the number of requests per year and provide examples indicating the Member State, the sector and the type of content concerned.*

[Open question]

.....  
.....

4. *If you have identified problems in the answers to any of the questions above – what would be the best way to tackle them?*

[Open question]

.....  
.....

5. *[In particular if you are a right holder or a collective management organisation:] Are there reasons why, even in cases where you hold all the necessary rights for all the territories in question, you would still find it necessary or justified to impose territorial restrictions on a service provider (in order, for instance, to ensure that access to certain content is not possible in certain European countries)?*

YES– Please explain by giving examples

.....  
.....

NO

NO OPINION

6. *[In particular if you are e.g. a broadcaster or a service provider:] Are there reasons why, even in cases where you have acquired all the necessary rights for all the territories in question, you would still find it necessary or justified to impose territorial restrictions on the service recipient (in order for instance, to redirect the consumer to a different website than the one he is trying to access)?*

YES– Please explain by giving examples

**Although we believe that in many cases Pan-European rights are adopted by the rightsholders, the latter sometimes imposes territorial restrictions on the supply of e-books.**

**In the UK, e-book sales now represent around an estimated 22% of total book sales, a higher market share than in all other member states. In Christmas 2012, 63% of all The Booksellers Association’s outlets in the UK & Ireland were selling e-readers or tablets. [N.B. Comparable Christmas 2013 figures are not available.]**

**But offering to supply e-books to consumers in other member states presents a bookseller with a number of undeniable difficulties. First of all – as we have indicated – there might be territorial restrictions. Then the margins in the e-book environment are painfully thin. On the hardware, a retailer would in all likelihood receive a discount of less than 5%; on the e-book itself, maybe 9% if you are working with an aggregator. Out of these margins a bookseller would have to finance some pretty expensive costs. These might include technical implementation costs, marketing costs, maintenance costs and translation costs. So some booksellers may well have taken a judgement and elected for business reasons not to sell e-books.**

NO

NO OPINION

**7. Do you think that further measures (legislative or non-legislative, including market-led solutions) are needed at EU level to increase the cross-border availability of content services in the Single Market, while ensuring an adequate level of protection for right holders?**

YES– Please explain

**We believe that it should be possible for the consumer to be able to read any e-book on any device and to be able to obtain that e-book from any supplier. But more often than not a consumer buys an e-book for an e-book reader and is then locked into that supplier’s ecosystem, so full Interoperability does not operate.**

**The European Booksellers Federation recently commissioned a Report from the Gutenberg University: “On the Interoperability of e-book formats”. This work showed that there was no technical reason why full Interoperability could not be achieved. The Vice-President of the European Commission, Neelie Kroes, in charge of the Digital Agenda, praised the EBF study: “My wish is that booksellers in Europe can take initiatives and benefit from the growth in the ebook markets. This is why I welcome this study by the European Booksellers Federation. Interoperability is a major requirement to build a truly digital society. This applies to ebooks too. This study provides interesting insights on ways to reach true interoperability in the ebook market, through both interoperable ebook formats and interoperable DRM schemes. Now is the time for open standards regarding ebooks, just like has happened in other areas of the digital economy.”**

**Full Interoperability within the e-book market could help greatly to improve cross-border availability of e-books, to the benefit of European consumers.**

.....  
.....  
 NO– Please explain

.....  
.....  
 NO OPINION

## ***Is there a need for more clarity as regards the scope of what needs to be authorised (or not) in digital transmissions?***

### ***[The definition of the rights involved in digital transmissions]***

The EU framework for the protection of copyright and related rights in the digital environment is largely established by Directive 2001/29/EC<sup>16</sup> on the harmonisation of certain aspects of copyright and related rights in the information society. Other EU directives in this field that are relevant in the online environment are those relating to the protection of software<sup>17</sup> and databases<sup>18</sup>.

Directive 2001/29/EC harmonises the rights of authors and neighbouring rightholders<sup>19</sup> which are essential for the transmission of digital copies of works (e.g. an e-book) and other protected subject matter (e.g. a record in a MP3 format) over the internet or similar digital networks.

The most relevant rights for digital transmissions are the reproduction right, i.e. the right to authorise or prohibit the making of copies<sup>20</sup>, (notably relevant at the start of the transmission – e.g. the uploading of a digital copy of a work to a server in view of making it available – and at the users’ end – e.g. when a user downloads a digital copy of a work) and the communication to the public/making available right, i.e. the rights to authorise or prohibit the dissemination of the works in digital networks<sup>21</sup>. These rights are intrinsically linked in digital transmissions and both need to be cleared.

### **The act of “making available”**

Directive 2001/29/EC specifies neither what is covered by the making available right (e.g. the upload, the accessibility by the public, the actual reception by the public) nor where the act of “making available” takes place. This does not raise questions if the act is limited to a single territory. Questions arise however when the transmission covers several territories and rights need to be cleared (does the act of “making available” happen in the country of the upload only? in each of the countries where the content is potentially accessible? in each of the countries where the content is effectively accessed?). The most recent case law of the Court of Justice of the European Union (CJEU) suggests that a relevant criterion is the “targeting” of a certain Member State's public<sup>22</sup>. According to this approach the copyright-relevant act (which has to be licensed) occurs at least in those countries which are “targeted” by the online

---

<sup>16</sup> Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society.

<sup>17</sup> Directive 2009/24/EC of the European Parliament and of the Council of 23 April 2009 on the legal protection of computer programs.

<sup>18</sup> Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases.

<sup>19</sup> Film and record producers, performers and broadcasters are holders of so-called “neighbouring rights” in, respectively, their films, records, performances and broadcast. Authors’ content protected by copyright is referred to as a “work” or “works”, while content protected by neighbouring rights is referred to as “other subject matter”.

<sup>20</sup> The right to “authorise or prohibit direct or indirect, temporary or permanent reproduction by any means and in any form, in whole or in part” (see Art. 2 of Directive 2001/29/EC) although temporary acts of reproduction of a transient or incidental nature are, under certain conditions, excluded (see art. 5(1) of Directive 2001/29/EC).

<sup>21</sup> The right to authorise or prohibit any communication to the public by wire or wireless means and to authorise or prohibit the making available to the public “on demand” (see Art. 3 of Directive 2001/29/EC).

<sup>22</sup> See in particular Case C-173/11 (Football Dataco vs Sportradar) and Case C-5/11 (Donner) for copyright and related rights, and Case C-324/09 (L’Oréal vs eBay) for trademarks. With regard to jurisdiction see also joined Cases C-585/08 and C-144/09 (Pammer and Hotel Alpenhof) and pending Case C-441/13 (Pez Hejduk); see however, adopting a different approach, Case C-170/12 (Pinckney vs KDG Mediatech).

service provider. A service provider “targets” a group of customers residing in a specific country when it directs its activity to that group, e.g. via advertisement, promotions, a language or a currency specifically targeted at that group.

**8. *Is the scope of the “making available” right in cross-border situations – i.e. when content is disseminated across borders – sufficiently clear?***

YES

**Although the default of territorial rights is Pan-European, the terms and conditions of supply imposed by the rightsholder do sometimes make it impossible for an e-book to be supplied from one member state to another.**

NO – Please explain how this could be clarified and what type of clarification would be required (e.g. as in "targeting" approach explained above, as in "country of origin" approach<sup>23</sup>)

.....

.....

NO OPINION

**9. *[In particular if you are a right holder:] Could a clarification of the territorial scope of the “making available” right have an effect on the recognition of your rights (e.g. whether you are considered to be an author or not, whether you are considered to have transferred your rights or not), on your remuneration, or on the enforcement of rights (including the availability of injunctive relief<sup>24</sup>)?***

YES– Please explain how such potential effects could be addressed

.....

.....

NO

NO OPINION

**Two rights involved in a single act of exploitation**

Each act of transmission in digital networks entails (in the current state of technology and law) several reproductions. This means that there are two rights that apply to digital transmissions: the reproduction right and the making available right. This may complicate the licensing of works for online use notably when the two rights are held by different persons/entities.

---

<sup>23</sup> The objective of implementing a “country of origin” approach is to localise the copyright relevant act that must be licenced in a single Member State (the "country of origin", which could be for example the Member State in which the content is uploaded or where the service provider is established), regardless of in how many Member States the work can be accessed or received. Such an approach has already been introduced at EU level with regard to broadcasting by satellite (see Directive 93/83/EEC on the coordination of certain rules concerning copyright and rights related to copyright applicable to satellite broadcasting and cable retransmission).

<sup>24</sup> Injunctive relief is a temporary or permanent remedy allowing the right holder to stop or prevent an infringement of his/her right.

**10. [In particular if you a service provider or a right holder:] Does the application of two rights to a single act of economic exploitation in the online environment (e.g. a download) create problems for you?**

YES– Please explain what type of measures would be needed in order to address such problems (e.g. facilitation of joint licences when the rights are in different hands, legislation to achieve the "bundling of rights")

.....  
.....

NO

NO OPINION

### Linking and browsing

Hyperlinks are references to data that lead a user from one location in the Internet to another. They are indispensable for the functioning of the Internet as a network. Several cases are pending before the CJEU<sup>25</sup> in which the question has been raised whether the provision of a clickable link constitutes an act of communication to the public/making available to the public subject to the authorisation of the rightholder.

A user browsing the internet (e.g. viewing a web-page) regularly creates temporary copies of works and other subject-matter protected under copyright on the screen and in the 'cache' memory of his computer. A question has been referred to the CJEU<sup>26</sup> as to whether such copies are always covered by the mandatory exception for temporary acts of reproduction provided for in Article 5(1) of Directive 2001/29/EC.

**11. Should the provision of a hyperlink leading to a work or other subject matter protected under copyright, either in general or under specific circumstances, be subject to the authorisation of the rightholder?**

YES– Please explain whether you consider this to be the case in general, or under specific circumstances, and why

**It is pretty easy for someone with a bit of digital expertise to be able to get round DRM protection and copy illegally a digital file. Illegal copying and piracy of Intellectual Property is theft.**

**The Booksellers Association believes that Copyright is the rock on which our industry is founded. It enables those who create to be rewarded. Any illegal copying, therefore, reduces significantly the chance that the book will be purchased in the future, leading not only to lost sales for the rightholders (both publishers and authors) but also for the booksellers.**

NO– Please explain whether you consider this to be the case in general, or under specific circumstances, and why (e.g. because it does not amount to an act of communication to the public – or to a new public, or because it should be covered by a copyright exception)

.....  
.....

NO OPINION

<sup>25</sup> Cases C-466/12 (Svensson), C-348/13 (Bestwater International) and C-279/13 (C More entertainment).

<sup>26</sup> Case C-360/13 (Public Relations Consultants Association Ltd). See also

### **Download to own digital content**

Digital content is increasingly being bought via digital transmission (e.g. download to own). Questions arise as to the possibility for users to dispose of the files they buy in this manner (e.g. by selling them or by giving them as a gift). The principle of EU exhaustion of the distribution right applies in the case of the distribution of physical copies (e.g. when a tangible article such as a CD or a book, etc. is sold, the right holder cannot prevent the further distribution of that tangible article)<sup>27</sup>. The issue that arises here is whether this principle can also be applied in the case of an act of transmission equivalent in its effect to distribution (i.e. where the buyer acquires the property of the copy)<sup>28</sup>. This raises difficult questions, notably relating to the practical application of such an approach (how to avoid re-sellers keeping and using a copy of a work after they have “re-sold” it – this is often referred to as the “forward and delete” question) as well as to the economic implications of the creation of a second-hand market of copies of perfect quality that never deteriorate (in contrast to the second-hand market for physical goods).

**13. [In particular if you are an end user/consumer:] Have you faced restrictions when trying to resell digital files that you have purchased (e.g. mp3 file, e-book)?**

YES– Please explain by giving examples

.....  
.....

NO

<sup>27</sup> See also recital 28 of Directive 2001/29/EC.

<sup>28</sup> In Case C-128/11 (Oracle vs. UsedSoft) the CJEU ruled that an author cannot oppose the resale of a second-hand licence that allows downloading his computer program from his website and using it for an unlimited period of time. The exclusive right of distribution of a copy of a computer program covered by such a licence is exhausted on its first sale. While it is thus admitted that the distribution right may be subject to exhaustion in case of computer programs offered for download with the right holder's consent, the Court was careful to emphasise that it reached this decision based on the Computer Programs Directive. It was stressed that this exhaustion rule constituted a *lex specialis* in relation to the Information Society Directive (UsedSoft, par. 51, 56).

NO OPINION

**14. [In particular if you are a right holder or a service provider:] What would be the consequences of providing a legal framework enabling the resale of previously purchased digital content? Please specify per market (type of content) concerned.**

[Open question]

.....  
.....

***Registration of works and other subject matter – is it a good idea?***

Registration is not often discussed in copyright in the EU as the existing international treaties in the area prohibit formalities as a condition for the protection and exercise of rights. However, this prohibition is not absolute<sup>29</sup>. Moreover a system of registration does not need to be made compulsory or constitute a precondition for the protection and exercise of rights. With a longer term of protection and with the increased opportunities that digital technology provides for the use of content (including older works and works that otherwise would not have been disseminated), the advantages and disadvantages of a system of registration are increasingly being considered<sup>30</sup>.

**15. Would the creation of a registration system at EU level help in the identification and licensing of works and other subject matter?**

- YES
- NO
- NO OPINION

**16. What would be the possible advantages of such a system?**

[Open question]

.....  
.....

**17. What would be the possible disadvantages of such a system?**

[Open question]

.....  
.....

**18. What incentives for registration by rightholders could be envisaged?**

<sup>29</sup> For example, it does not affect “domestic” works – i.e. works originating in the country imposing the formalities as opposed to works originating in another country.

<sup>30</sup> On the basis of Article 3.6 of the Directive 2012/28/EU of the European Parliament and of the Council of 25 October 2012 on certain permitted uses of orphan works, a publicly accessible online database is currently being set up by the Office for Harmonisation of the Internal Market (OHIM) for the registration of orphan works.

[Open question]

.....  
.....

### ***How to improve the use and interoperability of identifiers***

There are many private databases of works and other subject matter held by producers, collective management organisations, and institutions such as libraries, which are based to a greater or lesser extent on the use of (more or less) interoperable, internationally agreed ‘identifiers’. Identifiers can be compared to a reference number embedded in a work, are specific to the sector in which they have been developed<sup>31</sup>, and identify, variously, the work itself, the owner or the contributor to a work or other subject matter. There are notable examples of where industry is undertaking actions to improve the interoperability of such identifiers and databases. The Global Repertoire Database<sup>32</sup> should, once operational, provide a single source of information on the ownership and control of musical works worldwide. The Linked Content Coalition<sup>33</sup> was established to develop building blocks for the expression and management of rights and licensing across all content and media types. It includes the development of a Rights Reference Model (RRM) – a comprehensive data model for all types of rights in all types of content. The UK Copyright Hub<sup>34</sup> is seeking to take such identification systems a step further, and to create a linked platform, enabling automated licensing across different sectors.

***19. What should be the role of the EU in promoting the adoption of identifiers in the content sector, and in promoting the development and interoperability of rights ownership and permissions databases?***

[Open question]

.....  
.....

### ***Term of protection – is it appropriate?***

Works and other subject matter are protected under copyright for a limited period of time. After the term of protection has expired, a work falls into the public domain and can be freely used by anyone (in accordance with the applicable national rules on moral rights). The Berne Convention<sup>35</sup> requires a minimum term of protection of 50 years after the death of the author. The EU rules extend this term of protection to 70 years after the death of the author (as do many other countries, e.g. the US).

With regard to performers in the music sector and phonogram producers, the term provided for in the EU rules also extend 20 years beyond what is mandated in international agreements, providing for a term of protection of 70 years after the first publication. Performers and

<sup>31</sup> E.g. the International Standard Recording Code (ISRC) is used to identify recordings, the International Standard Book Number (ISBN) is used to identify books.

**Limitations and exceptions in the Single Market**

Limitations and exceptions to copyright and related rights enable the use of works and other protected subject-matter, without obtaining authorisation from the rightholders, for certain purposes and to a certain extent (for instance the use for illustration purposes of an extract from a novel by a teacher in a literature class). At EU level they are established in a number of copyright directives, most notably Directive 2001/29/EC<sup>36</sup>.

Exceptions and limitations in the national and EU copyright laws have to respect international law<sup>37</sup>. In accordance with international obligations, the EU *acquis* requires that limitations and exceptions can only be applied in certain special cases which do not conflict with a normal exploitation of the work or other subject matter and do not unreasonably prejudice the legitimate interest of the rightholders.

Whereas the catalogue of limitations and exceptions included in EU law is exhaustive (no other exceptions can be applied to the rights harmonised at EU level)<sup>38</sup>, these limitations and exceptions are often optional<sup>39</sup>, in the sense that Member States are free to reflect in national legislation as many or as few of them as they wish. Moreover, the formulation of certain of the limitations and exceptions is general enough to give significant flexibility to the Member States as to how, and to what extent, to implement them (if they decide to do so). Finally, it is worth noting that not all of the limitations and exceptions included in the EU legal framework for copyright are of equivalent significance in policy terms and in terms of their potential effect on the functioning of the Single Market.

In addition, in the same manner that the definition of the rights is territorial (i.e. has an effect only within the territory of the Member State), the definition of the limitations and exceptions

<sup>36</sup> Plus Directive 96/9/EC on the legal protection of databases; Directive 2009/24/EC on the legal protection of computer programs, and Directive 92/100/EC on rental right and lending right.

<sup>37</sup> Article 9(2) of the Berne Convention for the Protection of Literary and Artistic Works (1971); Article 13 of the TRIPS Agreement (Trade Related Intellectual Property Rights) 1994; Article 16(2) of the WIPO Performers and Phonograms Treaty (1996); Article 9(2) of the WIPO Copyright Treaty (1996).

<sup>38</sup> Other than the grandfathering of the exceptions of minor importance for analogue uses existing in Member States at the time of adoption of Directive 2001/29/EC (see, Art. 5(3)(o)).

<sup>39</sup> With the exception of certain limitations: (i) in the Computer Programs Directive, (ii) in the Database Directive, (iii) Article 5(1) in the Directive 2001/29/EC and (iv) the Orphan Works Directive.

to the rights is territorial too (so an act that is covered by an exception in a Member State "A" may still require the authorisation of the rightholder once we move to the Member State "B")<sup>40</sup>.

The cross-border effect of limitations and exceptions also raises the question of fair compensation of rightholders. In some instances, Member States are obliged to compensate rightholders for the harm inflicted on them by a limitation or exception to their rights. In other instances Member States are not obliged, but may decide, to provide for such compensation. If a limitation or exception triggering a mechanism of fair compensation were to be given cross-border effect (e.g. the books are used for illustration in an online course given by an university in a Member State "A" and the students are in a Member State "B") then there would also be a need to clarify which national law should determine the level of that compensation and who should pay it.

Finally, the question of flexibility and adaptability is being raised: what is the best mechanism to ensure that the EU and Member States' regulatory frameworks adapt when necessary (either to clarify that certain uses are covered by an exception or to confirm that for certain uses the authorisation of rightholders is required)? The main question here is whether a greater degree of flexibility can be introduced in the EU and Member States regulatory framework while ensuring the required legal certainty, including for the functioning of the Single Market, and respecting the EU's international obligations.

***21. Are there problems arising from the fact that most limitations and exceptions provided in the EU copyright directives are optional for the Member States?***

[Open question]

.....

.....

## **A. Access to content in libraries and archives**

Directive 2001/29/EC enables Member States to reflect in their national law a range of limitations and exceptions for the benefit of publicly accessible libraries, educational establishments and museums, as well as archives. If implemented, these exceptions allow acts of preservation and archiving<sup>41</sup> and enable on-site consultation of the works and other subject matter in the collections of such institutions<sup>42</sup>. The public lending (under an exception or limitation) by these establishments of physical copies of works and other subject matter is governed by the Rental and Lending Directive<sup>43</sup>.

Questions arise as to whether the current framework continues to achieve the objectives envisaged or whether it needs to be clarified or updated to cover use in digital networks. At the same time, questions arise as to the effect of such a possible expansion on the normal exploitation of works and other subject matter and as to the prejudice this may cause to rightholders. The role of licensing and possible framework agreements between different stakeholders also needs to be considered here.

### **1. Preservation and archiving**

The preservation of the copies of works or other subject-matter held in the collections of cultural establishments (e.g. books, records, or films) – the restoration or replacement of works, the copying of fragile works - may involve the creation of another copy/ies of these works or other subject matter. Most Member States provide for an exception in their national laws allowing for the making of such preservation copies. The scope of the exception differs from Member State to Member State (as regards the type of beneficiary establishments, the types of works/subject-matter covered by the exception, the mode of copying and the number of reproductions that a beneficiary establishment may make). Also, the current legal status of new types of preservation activities (e.g. harvesting and archiving publicly available web content) is often uncertain.

**28. (a) [In particular if you are an institutional user:] Have you experienced specific problems when trying to use an exception to preserve and archive specific works or other subject matter in your collection?**

**(b) [In particular if you are a right holder:] Have you experienced problems with the use by libraries, educational establishments, museum or archives of the preservation exception?**

### **Off-premises access to library collections**

Directive 2001/29/EC provides an exception for the consultation of works and other subject-matter (consulting an e-book, watching a documentary) via dedicated terminals on the premises of such establishments for the purpose of research and private study. The online consultation of works and other subject-matter remotely (i.e. when the library user is not on the premises of the library) requires authorisation and is generally addressed in agreements between universities/libraries and publishers. Some argue that the law rather than agreements should provide for the possibility to, and the conditions for, granting online access to collections.

**32. (a) [In particular if you are an institutional user:] Have you experienced specific problems when trying to negotiate agreements with rights holders that enable you to provide remote access, including across borders, to your collections (or parts thereof) for purposes of research and private study?**

**(b) [In particular if you are an end user/consumer:] Have you experienced specific problems when trying to consult, including across borders, works and other subject-matter held in the collections of institutions such as universities and national libraries when you are not on the premises of the institutions in question?**

*(c) [In particular if you are a right holder:] Have you negotiated agreements with institutional users that enable those institutions to provide remote access, including across borders, to the works or other subject-matter in their collections, for purposes of research and private study?*

## **E – lending**

Traditionally, public libraries have loaned physical copies of works (i.e. books, sometimes also CDs and DVDs) to their users. Recent technological developments have made it technically possible for libraries to provide users with temporary access to digital content, such as e-books, music or films via networks. Under the current legal framework, libraries need to obtain the authorisation of the rights holders to organise such e-lending activities. In various Member States, publishers and libraries are currently experimenting with different business models for the making available of works online, including direct supply of e-books to libraries by publishers or bundling by aggregators.

**36. (a) [In particular if you are a library:] Have you experienced specific problems when trying to negotiate agreements to enable the electronic lending (e-lending), including across borders, of books or other materials held in your collection?**

**(b) [In particular if you are an end user/consumer:] Have you experienced specific problems when trying to borrow books or other materials electronically (e-lending), including across borders, from institutions such as public libraries?**

(c) [In particular if you are a right holder:] *Have you negotiated agreements with libraries to enable them to lend books or other materials electronically, including across borders?*

YES– Please explain with specific examples

.....  
.....

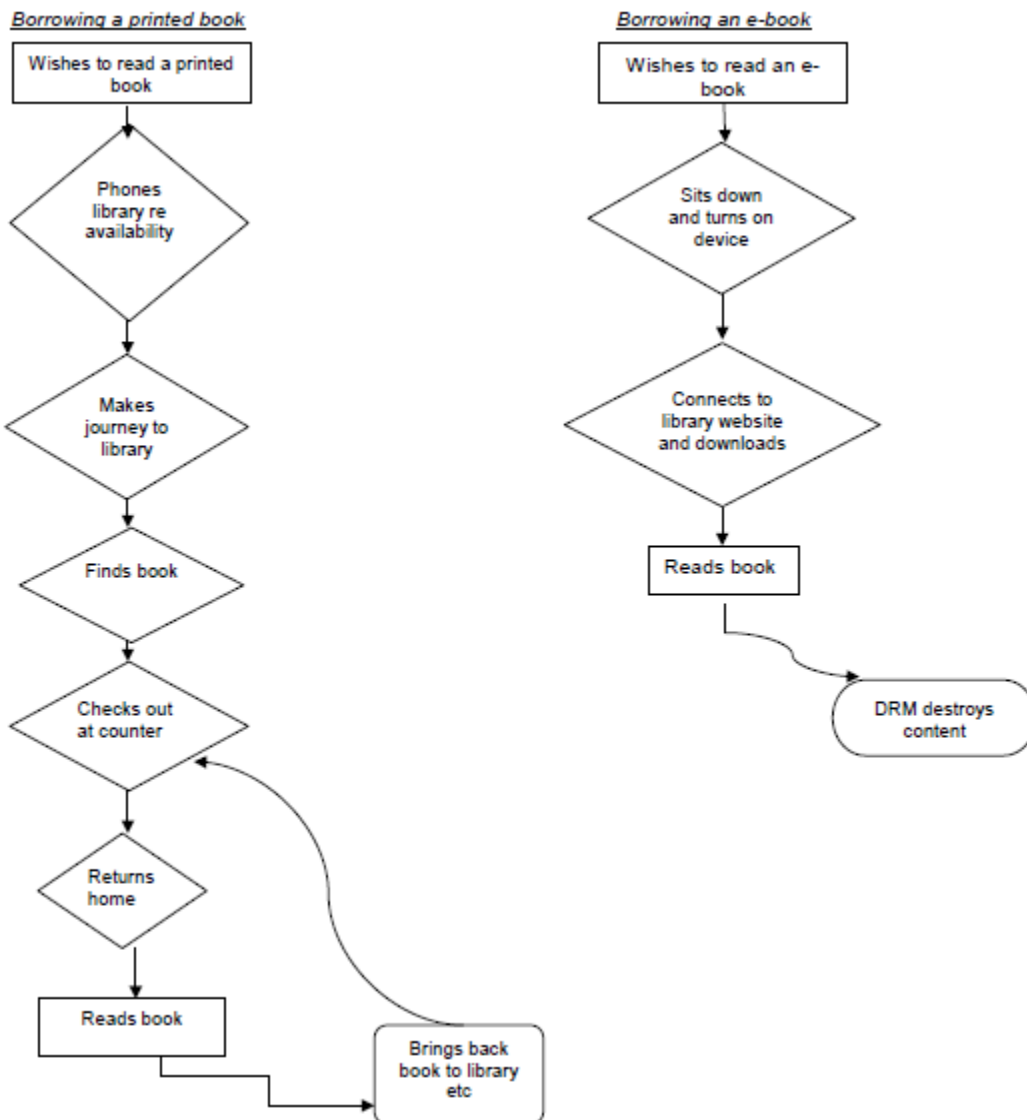

NO

NO OPINION

**37. If there are problems, how would they best be solved?**

[Open question]

**Borrowing a print book from a library is very different from borrowing an e-book. Borrowing an e-book remotely is just so easy.**

E-book lending remotely is as easy as a click of a mouse. As Richard Mollet, Chief Executive of the Publishers Association said: “*In a world in which it is as simple to borrow as to buy, people will borrow, not buy*”. In the UK, public libraries are loaning e-books without any fee being required from the borrower. This means that there is a considerable difference in ‘value’ between the price of an e-book supplied by a bookseller and a book that you can borrow for free.

These are the thoughts of The Booksellers Association on e-book lending:

1. **The Creative Value Chain has to be well funded.** We believe it is essential that the Literary Creative Value Chain continues to be well funded. Without adequate reward, authors and publishers would not be able to bring to the market the wide selection of titles that they currently offer. The primary way the Creative Value Chain is funded, of course, is via the sale of books – both print and ‘e’. The commercial sector makes the essential financial contribution to the Value Chain. Permitting e-book lending without adequate safeguards risks undermining (i) the sale of books and (ii) the funding of this creative sector of the economy. If authors, publishers and booksellers are harmed, consumers are also harmed.
2. **The lending of an e-book should mirror the way a printed book is loaned.**
3. **Libraries should only be permitted to loan out an e-book if the rightsholder (publisher/author) has given prior permission.**
4. **One file = one user at a time is viewed by our Association as the best model out of all those mooted.**
5. **Any e-book lent should be to library users only. In the past, some borrowers of e-books from UK public libraries were found to be as far away as China. Piracy is not in the interests of anyone in the Value Chain.**
6. **Any e-book lent should be automatically removed from the borrowing device when the loan has expired.**
7. **Consideration should be given to involving booksellers in the e-book lending process (as is done in France with Dilicom/PNB).**
8. **Copyright exhaustion rights should not be extended to e-books. If e-books have the same exhaustion rights as e-books, libraries would be given great freedom to more or less do what they liked once they had bought the e-book initially, leading to a substantial increase in e-book lending and a fall of bookshop sales. We do not believe that ‘exhaustion’ should be made a statutory exception, as such a move would fail the “Three Step Test” in copyright law, as there would be a conflict with the normal exploitation of the work and the legitimate interests of the author would be prejudiced.**
9. **Selling books should be left to commercial booksellers – not libraries. Libraries – and all publicly funded institutions – need to avoid distorting commercial markets. Whether a bookshop survives or goes out of business, whether Mobipocket or EPUB does well, depends on consumers. Without safeguards, e-book lending on a substantial scale by libraries risks distorting these choices and therefore distorting competitive markets, putting the essential financial contribution at risk. In our view, the Libraries’ ‘remit’ is to loan books – to give to users limited access to copyright material ..... while the user avoids paying for the material outright. To avoid distorting competition, libraries should not be funded by the taxpayer to sell books, become another retail channel and compete against commercial booksellers.**
10. **Potential book buyers should be directed by librarians to booksellers. The BA has developed a free *Find Your Local Bookshop* web button webcode, which directs browsers to the BA’s membership database. The webcode is extremely easy to imbed in individual library websites.**

The following two questions are relevant both to this point (n° 3) and the previous one (n° 2).

**38. [In particular if you are an institutional user:] What differences do you see in the management of physical and online collections, including providing access to your subscribers? What problems have you encountered?**

[Open question]

.....  
.....

**39. [In particular if you are a right holder:] What difference do you see between libraries' traditional activities such as on-premises consultation or public lending and activities such as off-premises (online, at a distance) consultation and e-lending? What problems have you encountered?**

[Open question]

.....  
.....

## Mass digitisation

The term “mass digitisation” is normally used to refer to efforts by institutions such as libraries and archives to digitise (e.g. scan) the entire content or part of their collections with an objective to preserve these collections and, normally, to make them available to the public. Examples are efforts by libraries to digitise novels from the early part of the 20<sup>th</sup> century or whole collections of pictures of historical value. This matter has been partly addressed at the EU level by the 2011 Memorandum of Understanding (MoU) on key principles on the digitisation and making available of out of commerce works (i.e. works which are no longer found in the normal channels of commerce), which is aiming to facilitate mass digitisation efforts (for books and learned journals) on the basis of licence agreements between libraries and similar cultural institutions on the one hand and the collecting societies representing authors and publishers on the other<sup>44</sup>. Provided the required funding is ensured (digitisation projects are extremely expensive), the result of this MoU should be that books that are currently to be found only in the archives of, for instance, libraries will be digitised and made available online to everyone. The MoU is based on voluntary licences (granted by Collective Management Organisations on the basis of the mandates they receive from authors and publishers). Some Member States may need to enact legislation to ensure the largest possible effect of such licences (e.g. by establishing in legislation a presumption of representation of a collecting society or the recognition of an “extended effect” to the licences granted)<sup>45</sup>.

<sup>44</sup> You will find more information about his MoU on the following website: [http://ec.europa.eu/internal\\_market/copyright/out-of-commerce/index\\_en.htm](http://ec.europa.eu/internal_market/copyright/out-of-commerce/index_en.htm).

<sup>45</sup> France and Germany have already adopted legislation to back the effects of the MoU. The French act (LOI n° 2012-287 du 1er mars 2012 relative à l'exploitation numérique des livres indisponibles du xxe siècle) foresees collective management, unless the author or publisher in question opposes such management. The German act (Gesetz zur Nutzung verwaister und vergriffener Werke und einer weiteren Änderung des Urheberrechtsgesetzes vom 1. Oktober 2013) contains a legal presumption of representation by a collecting society in relation to works whose rightholders are not members of the collecting society.

**40.** *[In particular if you are an institutional user, engaging or wanting to engage in mass digitisation projects, a right holder, a collective management organisation:] Would it be necessary in your country to enact legislation to ensure that the results of the 2011 MoU (i.e. the agreements concluded between libraries and collecting societies) have a cross-border effect so that out of commerce works can be accessed across the EU?*

## **Teaching**

Directive 2001/29/EC<sup>46</sup> enables Member States to implement in their national legislation limitations and exceptions for the purpose of illustration for non-commercial teaching. Such exceptions would typically allow a teacher to use parts of or full works to illustrate his course, e.g. by distributing copies of fragments of a book or of newspaper articles in the classroom or by showing protected content on a smart board without having to obtain authorisation from the right holders. The open formulation of this (optional) provision allows for rather different implementation at Member States level. The implementation of the exception differs from Member State to Member State, with several Member States providing instead a framework for the licensing of content for certain educational uses. Some argue that the law should provide for better possibilities for distance learning and study at home.

**42. (a)** *[In particular if you are an end user/consumer or an institutional user:] Have you experienced specific problems when trying to use works or other subject-matter for illustration for teaching, including across borders?*

<sup>46</sup> Article 5(3)a of Directive 2001/29.

[Open question]

.....  
.....

**Disabilities**

Directive 2001/29/EC<sup>48</sup> provides for an exception/limitation for the benefit of people with a disability. The open formulation of this (optional) provision allows for rather different implementations at Member States level. At EU and international level projects have been launched to increase the accessibility of works and other subject-matter for persons with disabilities (notably by increasing the number of works published in special formats and facilitating their distribution across the European Union)<sup>49</sup>.

<sup>48</sup> Article 5 (3)b of Directive 2001/29.

<sup>49</sup> The European Trusted Intermediaries Network (ETIN) resulting from a Memorandum of Understanding between representatives of the right-holder community (publishers, authors, collecting societies) and interested parties such as associations for blind and dyslexic persons ([http://ec.europa.eu/internal\\_market/copyright/initiatives/access/index\\_en.htm](http://ec.europa.eu/internal_market/copyright/initiatives/access/index_en.htm)) and the Trusted Intermediary Global Accessible Resources (TIGAR) project in WIPO (<http://www.visionip.org/portal/en/>).

The Marrakesh Treaty<sup>50</sup> has been adopted to facilitate access to published works for persons who are blind, visually impaired, or otherwise print disabled. The Treaty creates a mandatory exception to copyright that allows organisations for the blind to produce, distribute and make available accessible format copies to visually impaired persons without the authorisation of the rightholders. The EU and its Member States have started work to sign and ratify the Treaty. This may require the adoption of certain provisions at EU level (e.g. to ensure the possibility to exchange accessible format copies across borders).

**50. (a) [In particular if you are a person with a disability or an organisation representing persons with disabilities:] Have you experienced problems with accessibility to content, including across borders, arising from Member States' implementation of this exception?**

## ***Text and data mining***

Text and data mining/content mining/data analytics<sup>51</sup> are different terms used to describe increasingly important techniques used in particular by researchers for the exploration of vast amounts of existing texts and data (e.g., journals, web sites, databases etc.). Through the use of software or other automated processes, an analysis is made of relevant texts and data in order to obtain new insights, patterns and trends.

The texts and data used for mining are either freely accessible on the internet or accessible through subscriptions to e.g. journals and periodicals that give access to the databases of publishers. A copy is made of the relevant texts and data (e.g. on browser cache memories or in computers RAM memories or onto the hard disk of a computer), prior to the actual analysis. Normally, it is considered that to mine protected works or other subject matter, it is necessary to obtain authorisation from the right holders for the making of such copies unless such authorisation can be implied (e.g. content accessible to general public without restrictions on the internet, open access).

Some argue that the copies required for text and data mining are covered by the exception for temporary copies in Article 5.1 of Directive 2001/29/EC. Others consider that text and data mining activities should not even be seen as covered by copyright. None of this is clear, in particular since text and data mining does not consist only of a single method, but can be undertaken in several different ways. Important questions also remain as to whether the main problems arising in relation to this issue go beyond copyright (i.e. beyond the necessity or not to obtain the authorisation to use content) and relate rather to the need to obtain “access” to content (i.e. being able to use e.g. commercial databases).

A specific Working Group was set up on this issue in the framework of the "Licences for Europe" stakeholder dialogue. No consensus was reached among participating stakeholders on either the problems to be addressed or the results. At the same time, practical solutions to facilitate text and data mining of subscription-based scientific content were presented by publishers as an outcome of “Licences for Europe”<sup>52</sup>. In the context of these discussions, other stakeholders argued that no additional licences should be required to mine material to which access has been provided through a subscription agreement and considered that a specific exception for text and data mining should be introduced, possibly on the basis of a distinction between commercial and non-commercial.

**53. (a) [In particular if you are an end user/consumer or an institutional user:] *Have you experienced obstacles, linked to copyright, when trying to use text or data mining methods, including across borders?***

**(b) [In particular if you are a service provider:] *Have you experienced obstacles, linked to copyright, when providing services based on text or data mining methods, including across borders?***

**(c) [In particular if you are a right holder:] *Have you experienced specific problems resulting from the use of text and data mining in relation to copyright protected content, including across borders?***

YES– Please explain

<sup>51</sup> For the purpose of the present document, the term “text and data mining” will be used.

***User-generated content***

Technological and service developments mean that citizens can copy, use and distribute content at little to no financial cost. As a consequence, new types of online activities are developing rapidly, including the making of so-called “user-generated content”. While users can create totally original content, they can also take one or several pre-existing works, change something in the work(s), and upload the result on the Internet e.g. to platforms and

blogs<sup>53</sup>. User-generated content (UGC) can thus cover the modification of pre-existing works even if the newly-generated/"uploaded" work does not necessarily require a creative effort and results from merely adding, subtracting or associating some pre-existing content with other pre-existing content. This kind of activity is not “new” as such. However, the development of social networking and social media sites that enable users to share content widely has vastly changed the scale of such activities and increased the potential economic impact for those holding rights in the pre-existing works. Re-use is no longer the preserve of a technically and artistically adept elite. With the possibilities offered by the new technologies, re-use is open to all, at no cost. This in turn raises questions with regard to fundamental rights such the freedom of expression and the right to property.

A specific Working Group was set up on this issue in the framework of the "Licences for Europe" stakeholder dialogue. No consensus was reached among participating stakeholders on either the problems to be addressed or the results or even the definition of UGC. Nevertheless, a wide range of views were presented as to the best way to respond to this phenomenon. One view was to say that a new exception is needed to cover UGC, in particular non-commercial activities by individuals such as combining existing musical works with videos, sequences of photos, etc. Another view was that no legislative change is needed: UGC is flourishing, and licensing schemes are increasingly available (licence schemes concluded between rightholders and platforms as well as micro-licences concluded between rightholders and the users generating the content. In any event, practical solutions to ease user-generated content and facilitate micro-licensing for small users were pledged by rightholders across different sectors as a result of the “Licences for Europe” discussions<sup>54</sup>.

## **Private copying and reprography**

Directive 2001/29/EC enables Member States to implement in their national legislation exceptions or limitations to the reproduction right for copies made for private use and photocopying<sup>55</sup>. Levies are charges imposed at national level on goods typically used for such purposes (blank media, recording equipment, photocopying machines, mobile listening devices such as mp3/mp4 players, computers, etc.) with a view to compensating rightholders for the harm they suffer when copies are made without their authorisation by certain categories of persons (i.e. natural persons making copies for their private use) or through use of certain technique (i.e. reprography). In that context, levies are important for rightholders.

With the constant developments in digital technology, the question arises as to whether the copying of files by consumers/end-users who have purchased content online - e.g. when a person has bought an MP3 file and goes on to store multiple copies of that file (in her computer, her tablet and her mobile phone) - also triggers, or should trigger, the application of private copying levies. It is argued that, in some cases, these levies may indeed be claimed by rightholders whether or not the licence fee paid by the service provider already covers copies made by the end user. This approach could potentially lead to instances of double payments whereby levies could be claimed on top of service providers' licence fees<sup>5657</sup>.

There is also an on-going discussion as to the application or not of levies to certain types of cloud-based services such as personal lockers or personal video recorders.

**64. In your view, is there a need to clarify at the EU level the scope and application of the private copying and reprography exceptions<sup>58</sup> in the digital environment?**

NO OPINION

Diverging national systems levy different products and apply different tariffs. This results in obstacles to the free circulation of goods and services in the Single Market. At the same time, many Member States continue to allow the indiscriminate application of private copying levies to all transactions irrespective of the person to whom the product subject to a levy is sold (e.g. private person or business). In that context, not all Member States have ex ante

<sup>59</sup> This issue was also addressed in the recommendations of Mr Antonio Vitorino resulting from the mediation on private copying and reprography levies

<sup>60</sup> This issue was also addressed in the recommendations of Mr Antonio Vitorino resulting from the mediation on private copying and reprography levies.

exemption and/or ex post reimbursement schemes which could remedy these situations and reduce the number of undue payments<sup>61</sup>.

**68. Have you experienced a situation where a cross-border transaction resulted in undue levy payments, or duplicate payments of the same levy, or other obstacles to the free movement of goods or services?**

[Open question]

.....  
.....

<sup>61</sup> This issue was also addressed in the recommendations of Mr Antonio Vitorino resulting from the mediation on private copying and reprography levies.

## **Fair remuneration of authors and performers**

The EU copyright acquis recognises for authors and performers a number of exclusive rights and, in the case of performers whose performances are fixed in phonograms, remuneration rights. There are few provisions in the EU copyright law governing the *transfer* of rights from authors or performers to producers<sup>62</sup> or determining who the owner of the rights is when the work or other subject matter is created in the context of an employment contract<sup>63</sup>. This is an area that has been traditionally left for Member States to regulate and there are significant differences in regulatory approaches. Substantial differences also exist between different sectors of the creative industries.

Concerns continue to be raised that authors and performers are not adequately remunerated, in particular but not solely, as regards online exploitation. Many consider that the economic benefit of new forms of exploitation is not being fairly shared along the whole value chain. Another commonly raised issue concerns contractual practices, negotiation mechanisms, presumptions of transfer of rights, buy-out clauses and the lack of possibility to terminate contracts. Some stakeholders are of the opinion that rules at national level do not suffice to improve their situation and that action at EU level is necessary.

**72. [In particular if you are an author/performer:] What is the best mechanism (or combination of mechanisms) to ensure that you receive an adequate remuneration for the exploitation of your works and performances?**

[Open question]

.....  
.....

**73. Is there a need to act at the EU level (for instance to prohibit certain clauses in contracts)?**

YES– Please explain

.....  
.....

NO– Please explain why

[Open question]

.....

<sup>62</sup> See e.g. Directive 92/100/EEC, Art.2(4)-(7).

<sup>63</sup> See e.g. Art. 2.3. of Directive 2009/24/EC, Art. 4 of Directive 96/9/EC.

.....

## **Respect for rights**

Directive 2004/48/EE<sup>64</sup> provides for a harmonised framework for the civil enforcement of intellectual property rights, including copyright and related rights. The Commission has consulted broadly on this text<sup>65</sup>. Concerns have been raised as to whether some of its provisions are still fit to ensure a proper respect for copyright in the digital age. On the one hand, the current measures seem to be insufficient to deal with the new challenges brought by the dissemination of digital content on the internet; on the other hand, there are concerns about the current balance between enforcement of copyright and the protection of fundamental rights, in particular the right for a private life and data protection. While it cannot be contested that enforcement measures should always be available in case of infringement of copyright, measures could be proposed to strengthen respect for copyright when the infringed content is used for a commercial purpose<sup>66</sup>. One means to do this could be to clarify the role of intermediaries in the IP infrastructure<sup>67</sup>. At the same time, there could be clarification of the safeguards for respect of private life and data protection for private users.

***75. Should the civil enforcement system in the EU be rendered more efficient for infringements of copyright committed with a commercial purpose?***

YES– Please explain

.....  
.....

NO– Please explain

.....  
.....

NO OPINION

***76. In particular, is the current legal framework clear enough to allow for sufficient involvement of intermediaries (such as Internet service providers, advertising brokers, payment service providers, domain name registrars, etc.) in inhibiting online copyright infringements with a commercial purpose? If not, what measures would be useful to foster the cooperation of intermediaries?***

[Open question]

.....  
.....

<sup>64</sup> Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights.

<sup>65</sup> You will find more information on the following website:

[http://ec.europa.eu/internal\\_market/ipenforcement/directive/index\\_en.htm](http://ec.europa.eu/internal_market/ipenforcement/directive/index_en.htm)

<sup>66</sup> For example when the infringing content is offered on a website which gets advertising revenues that depend on the volume of traffic.

<sup>67</sup> This clarification should not affect the liability regime of intermediary service providers established by Directive 2000/31/EC on electronic commerce, which will remain unchanged.

**77. Does the current civil enforcement framework ensure that the right balance is achieved between the right to have one’s copyright respected and other rights such as the protection of private life and protection of personal data?**

YES– Please explain

.....  
.....

NO– Please explain

.....  
.....

NO OPINION

### **A single EU Copyright Title**

The idea of establishing a unified EU Copyright Title has been present in the copyright debate for quite some time now, although views as to the merits and the feasibility of such an objective are divided. A unified EU Copyright Title would totally harmonise the area of copyright law in the EU and replace national laws. There would then be a single EU title instead of a bundle of national rights. Some see this as the only manner in which a truly Single Market for content protected by copyright can be ensured, while others believe that the same objective can better be achieved by establishing a higher level of harmonisation while allowing for a certain degree of flexibility and specificity in Member States’ legal systems.

**78. Should the EU pursue the establishment of a single EU Copyright Title, as a means of establishing a consistent framework for rights and exceptions to copyright across the EU, as well as a single framework for enforcement?**

YES

NO

NO OPINION

**79. Should this be the next step in the development of copyright in the EU? Does the current level of difference among the Member State legislation mean that this is a longer term project?**

[Open question]

.....  
.....

### **Other issues**

The above questionnaire aims to provide a comprehensive consultation on the most important matters relating to the current EU legal framework for copyright. Should any important matters have been omitted, we would appreciate if you could bring them to our attention, so they can be properly addressed in the future.

***80. Are there any other important matters related to the EU legal framework for copyright? Please explain and indicate how such matters should be addressed.***
